CUQUO

SMART

RECIPE BOOK

Features

Store your recipes in one place. *(Since back-end training is at the very end of the bootcamp, we will be working with pre-stored recipes at the beginning of the project.)*

➜ **Organize**
Filter through your recipes based on ingredients, cook time, preparation method and more.

➜ **Plan**
Plan out your recipes and generate grocery lists.

➜ **Discover**
Share your recipes and find new recipes.

Helene Blackmer

CUQUO

Organize.

Filter through your own recipes or new recipes with ingredients you would like to or need to use.

Filter through recipes based on cook time to fit your schedule.

Avoid having to pull out a calculator while cooking by easily adjusting serving sizes on the fly.

Helene Blackmer

Plan

Option to plan out recipes with a user-friendly calendar interface.

Quickly generate a grocery list for planned recipes.

Stretch Goal

Interface with Instacart or an online grocery store so users can order recipes through the website/app.

Helene Blackmer

CUQUO

Discover

Users can easily add recipes provided by Cuquo with a click of a button into their own recipe books.

Stretch Goals

- Share recipes with other users.

- Get customized recipe recommendations based off of stored recipes.

- Scan and store recipes from websites.

Helene Blackmer

CUQUO

Roadmap

Week 2-6

Define and refine features.
Make an attractive and easily navigable website with Bootstrap.

Week 13-17

Recreate the site into a mobile app.

Planning	Implementation

Week 7-12

Recreate the site with React.

Week 18-21

Add user authentication and add the ability to finally store recipes!
